### ***Expand the potential of your fabric tent structure***

If you're looking for a lighter-weight, clearspan fabric for your rental tent or permanent frame structure applications that's just as strong as heavier fabrics, Shelter-Rite® Tent™ is your solution.

Because Shelter-Rite Tent is 20% lighter than the industry standard, it's easier to handle, which leads to faster installation, decreased worker fatigue and less wear and tear during handling.

Designed with aesthetics in mind, its easy-to-clean surface makes Shelter-Rite Tent the right choice for weddings, trade shows, concerts and sporting events.

Made, stocked and serviced in the U.S., Shelter-Rite Tent is lighter-weight for easy handling and available in rolls. It is also customizable and able to be made in short runs of custom colors.

Since 1949, Seaman Corporation has been a world leader of innovative, high-performance coated fabrics. It is known worldwide for producing high-value, high-performance fabrics including FiberTite Roofing Systems, Shelter-Rite Architectural Fabrics, XR®-Geomembranes, and Shelter-Rite Truck Tarps, as well as collapsible fuel tanks and tent materials for military and government applications.
